DETAILED ACTION***Allowable Subject Matter***

1. Claims 1, 2, and 4-11 are allowed.
2. The following is an examiner's statement of reasons for allowance:
3. Tso et al., USPN 6,088,803, discloses a method for preventing activating a malicious object passing through a checkpoint (column 2 lines 16-19), and decreasing the overall inspection delay thereof (column 3 lines 11-14), the method including the steps of, creating an envelope file (column 3 lines 14-19) at the checkpoint, being an file including the object; and an indicator for indicating the integrity of the object (whether the final segment is present, column 3 lines 28-32), and forwarding the envelope file instead of the object toward its destination (column 3 lines 39-41), while holding at least a part of said envelope file which comprises the indicator (column 3 lines 23-28), inspecting the object (column 3 lines 41-44), setting the indicator on the envelope file to indicate the inspection result and releasing the rest of the envelope file (column 3 lines 62-65). In Tso, the envelope does not contain the executable, but is a copy of it missing the final segment. Having an envelope file that includes the object and code for extracting it is not found in Tso. It would not have been obvious for one of ordinary skill in the art to have the envelope in Tso contain executable code that could extract the object since the object is intentionally being withheld for virus checking.

Art Unit: 2132

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
